Subject: Respiratory pathology materials
Attachments: Resp path - synthesis section - 8May.docx; Resp path - Appendix - study quality table - 8May.docx

Andrew,

I have attached materials for incorporation into the draft Tox Review.

Attached are the following materials:

1. "Resp path - synthesis section - 8May.docx": includes a revised hazard ID synthesis and MOA text, evidence tables, and exposure-response arrays. Please note that due to the major revisions I made to the synthesis section, I have not copied out previously submitted content from the compiling document on the L drive.
2. "Resp path - Appendix - study quality table - 8May.docx": includes study quality table and accompanying text for animal studies. Previously, I had submitted the literature search materials.

Except for not having LitCited the attached, I believe I have now submitted all of the required materials for the animal respiratory pathology section.

Please let me know if you have any questions.

Brian
